

# Excellence in Nanofabrication Award

*The Excellence in Nanofabrication award recognizes outstanding research involving hands-on work at one or more nanofabrication laboratories in a post-secondary institution in Canada.*

Title	Presenters	University
Biosensing using Long Range Surface Plasmon Polariton Waveguides	Maryam Khodami	University of Ottawa
Design, fabrication and performance evaluation of photo-activated micro gas sensors based on semiconducting nanostructures	Ehsan Espid	University of British Columbia
GaN HEMT Fabrication Process	Aishwarya Parackal	University of Toronto
PolyCMUTs: Plastic Transducers for Ultrasound Imaging	Carlos Gerardo	University of British Columbia
